DETAILED ACTION

Priority

1. Receipt of acknowledged of papers submitted under 35 U.S.C. 119 (a) – (d), which papers have placed of record in the file.

Oath/Declaration

2. Oath and declaration filed on 1/27/2004 is accepted.

Information Disclosure Statement

3. The prior art documents submitted by applicant in the Information Disclosure Statement filed on 1/27/2004 and 3/5/2004 have all been considered and made of record (note the attached copy of form PTO – 1449).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102 (e) as being anticipated by Jin et al (6,451,420 B1).

Regarding claim 1, Jin et al discloses, a method of adjusting the optical thickness of a lens made from a material transparent to light to be used, comprising: adding one of layers of material which is the same as the material of a lens and of a material which has an index of refraction close to the index of refraction of material of the lens. At least one of vapor deposition or vapor growth to a surface of the lens so that optical thickness is increased (column 9, lines 64 – 67, column 10, lines 1- 4, column 6, lines 53 – 57).

Regarding claim 2, Jin et al discloses, a lens whose optical thickness has been adjusted by the adjusted method (column 9, lines 64 – 67, column 10, lines 1- 4).

Allowable Subject Matter

5. Claims 4, 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach the lens is a solid immersion lens.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Maehara (6,421,188 B1) discloses an optical element, which is usable in an optical system for a camera, a telescope, a microscope, or a semiconductor manufacturing apparatus.

Hendriks (us 2004/0125466 A1) discloses an optical scanning device for scanning an optical record carrier, to an objective system for use in such a scanning device and a method for manufacturing such an objective system.

Blankenbecler (5,044,737) discloses a double axial gradient lens and process for fabrication thereof.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammed Hasan whose telephone number is (571) 272-2331. The examiner can normally be reached on M-TH, 7:00 AM to 5:30 PM.
